INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/IT 03/00344

	Basis	of the	report
I.	Basis	or me	IEDOIL

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Desc	ription, Pages	
	1-5		as originally filed
	Clair	ns, Numbers	
	Ciaii 1-6	lis, Numbers	received on 24.03.2004 with letter of 15.03.2004
	1-0		
	Drav	vings, Sheets	
	1/4-4	./4	as originally filed
2.	With lang	regard to the langua uage in which the inte	ge, all the elements marked above were available or furnished to this Authority in the mational application was filed, unless otherwise indicated under this item.
			ilable or furnished to this Authority in the following language: , which is:
			nslation furnished for the purposes of the international search (under Rule 23.1(b)).
	П	the language of public	cation of the international application (under Rule 48.3(b)).
		the language of a trar Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary examination (under
3.	With	n regard to any nucleo mational preliminary e	otide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:
		contained in the inter	national application in written form.
		filed together with the	e international application in computer readable form.
		furnished subsequen	tly to this Authority in written form.
		furnished subsequen	tly to this Authority in computer readable form.
		in the international at	ne subsequently furnished written sequence listing does not go beyond the disclosure pplication as filed has been furnished.
		The statement that the listing has been furni	ne information recorded in computer readable form is identical to the written sequence ished.
4.	The	amendments have re	esulted in the cancellation of:
		the description,	pages:
		the claims,	Nos.:
		the drawings,	sheets:

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/IT 03/00344

5. 🏻	This report has been established as if (some of) the amendments had not been made, since the been considered to go beyond the disclosure as filed (Rule 70.2(c)).	hey l	have
------	---	-------	------

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-6

No: Claims

Inventive step (IS) Yes: Claims 1-6

No: Claims

Industrial applicability (IA) Yes: Claims 1-6

No: Claims

2. Citations and explanations

see separate sheet

INTERNATIONAL PRELIMINARY International application No. PCT/IT03/00344 EXAMINATION REPORT - SEPARATE SHEET

The prior published documents, cited in the international search report, either taken individually or in combination do not disclose, suggest or reasonably lead the person skilled in the art to consider the use of a rib structure comprising a structural shape and a plurality of saw-tooth engaged therein.

The person skilled in the art would not be able to combine all the features of anyone of the present independent claim and as such arrive at the claimed devices or methods without an inventive activity.

Dependent claims 2 to 6 are dependent on claim 1, and thus all the claims satisfy the requirements of Article 33(2)(3) PCT.

INTERNATIONAL SEARCH REPORT

PCT/IT 03/00344

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 A45B25/22

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

 $\begin{tabular}{ll} \begin{tabular}{ll} Minimum documentation searched (classification system followed by classification symbols) \\ IPC 7 & A45B \end{tabular}$

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

- 1. Umbrella structure with ribs (12) having a saw-tooth profile on the trailing edges of which are fixed strip portions of the cover, characterized in that each of said ribs consists of a structural shape (32, 132) and of a plurality of saw-tooth components (34) engaged with said structural shape and capable of fixing the strip portions (18) of the cover to it.
- 2. Structure according to Claim 1, characterized in that said structural shape (32) has a channel (32E) with a narrow slot (32A), and in that each of said saw-tooth components (34) has appendages which can be received in said channel by sliding and fixed therein.

10

15

20

- 3. Structure according to Claim 1 or 2, characterized in that each saw-tooth component (34) has an insertion base (34A) whose profile is such that it can enter and slide in said channel (32E) and can be fixed there, and an extension (34B) at an angle to the insertion base, to form the surface (34C) for fixing the cover strips (18).
- 4. Structure according to Claim 2 or 3, characterized in that each of said saw-tooth components (34) has a longitudinal appendage (34G) extending along the whole of the base (34A) for coupling to the structural shape (32).
- 5. Structure according to preceding claims, characterized in that said structural shape (32) is formed with a strip or transverse partition (32B) forming the base of said channel (32E) which is sufficiently thick for the engagement of screws (40) for fixing said saw-tooth components.
- 6. Structure according to Claims 1 to 4, characterized in that said structural shape (132 232) is shaped to receive nuts (142, 242) which can slide in the structural shape but are fixed to it with respect to rotation, enabling said saw-tooth components to be fixed by means of screws (141, 242).
